

BRAIN INTERNATIONAL SCHOOL

BIOLOGY Assignment

Class IX

Oct 18

CH: NATURAL RESOURCES

1. Define Biosphere .
2. How air helps in maintaining temperature around the earth ?
3. Why life is not possible on the Moon , Venus and Mars ?
4. Why water is necessary for living organisms ?
5. Why terrestrial organisms do not survive in saline condition?
6. Write the role of water in soil formation.
- 7 List the human activities responsible for Air pollution .
8. Mention the ways by which we can reduce the air pollution
9. How do Dams affects the life of waterbodies ?
- 10 . How we can reduce water pollution ?
- 11 Write the ways to prevent Soil pollution .
12. Draw the water cycle in nature
- 13 What is green house effect ? How it is checked ?
14. describe the role of ozone for saving our environment .
- 15 Name the substances in which nitrogen is present in plants and animals .
- 16 Name the forms in which nitrogen is absorbed by plants .
- 17 What is the percentage of carbon in air and earth crust ?
- 18 Name the biological processes involved in carbon cycle in nature .
19. Oxygen is harmful for some living beings . Comment .
- 20 Draw Nitrogen cycle in nature.
